Bailiff Enterprises, Inc.

Terms and Conditions

Warranty

Our tanks carry a limited three year **warranty** from the date of manufacture. This is true for tanks we mold as well as for those we get from other sources. Should a defect in workmanship or material appear under normal use, service and maintenance **within the warranty period** Bailiff Enterprises, Inc. will, at its option, either supply a new, equivalent tank in replacement thereof or repair the original tank or refund a prorated portion of the purchase price. Bailiff Enterprises' liability is limited to the tank itself and specifically excludes the cost of installation and/or removal or consequential damages. Please contact your chemical supplier for chemical resistance information. Operating beyond the temperature limits of a tank; operating at other than atmospheric pressure; or storing material that is chemically unsuitable for a tank are some specific examples of actions that void our warranty. There are a few applications such as storage of sulfuric acid, bio-diesel, bleach and caustic soda that carry a one year warranty rather than our standard 3 year warranty.

Fittings we install on a tank have a one year warranty from the date of installation. Should a defect in workmanship or material appear under normal use, service and maintenance **within the warranty period** Bailiff Enterprises, Inc. will, at its option, either repair the original fitting or refund a prorated portion of the purchase price of the fitting. Bailiff Enterprises' liability is limited to the fitting itself and specifically excludes consequential damages. Storing material that is chemically unsuitable for a gasket or fitting, or allowing the weight of pipes or plumbing to rest on the installed fitting are some specific examples of actions that void our warranty. Any optional additions to a tank including valves, heat tracing, ultrasonic level sensors and other items carry only the warranty supplied by the manufacturer of that item. Bailiff offers no warranty beyond the manufacturers warranty and is not responsible for any consequential damages.

Freight Claims

The person who signs the bill of lading when tanks are delivered **MUST** note any visible damage **on the bill of lading**. If there is no indication of damage, trucking companies will deny claims for damage in transit. We at Bailiff Enterprises, Inc. take great care to ship tanks that are in excellent condition. Once they leave our site, damage can occur while the tanks are in the hands of the trucking company. If there is no notation of damage on the signed bill of lading, trucking companies deny claims of damage. It is their right to do so.

It is important that whoever receives the tanks be trained to look for damage and note it on the bill of lading. Even if there is no designated space for such a notation, it must be written on the bill of lading. We value our customers and will assist in pursuing valid claims for damage to tanks when they are in transit. That being said, we cannot pursue such claims if the receiver of the tanks does not note damage.
